

Staircraft Launch Waste-Free Cut Decking For All

We are delighted to announce our decision to supply Waste-Free Cut Decking to all customers by Q2 2022. **This exciting change guarantees to improve your sustainability credentials by reducing site waste and helps us to achieve our environmental goals.** Given the current chipboard shortage, this change will release a huge amount of extra boards back into the market.

Our in-house software optimises i-Joist and decking designs to provide optimal layouts. Where required, boards are pre-cut giving site teams a faster and safer installation. Over the last 2 years many of our customers have switched from full-sized boards to Waste-Free Cut Decking and are currently enjoying the following benefits: -

- ✓ **Improvement in site safety – minimal cutting required on site, less dust & fewer large boards to handle**
- ✓ **20-30% reduction in site waste per plot - we supply the correct amount of boards**
- ✓ **No need to re-order extra boards**
- ✓ **Project cost reductions - less skips required**
- ✓ **Faster & more accurate installation – exact number of boards supplied with a full decking layout**
- ✓ **Quick access to installation details via QR code on each decking sheet**

Here's a powerful example of why we have to make this change:
If every new home built in the next 12 months moved to Staircraft's Waste-Free Cut Decking, this would result in:

- ✓ 20,000 less skips being required per annum
- ✓ 36,000m³ less waste in landfill per annum
- ✓ 1 million less sheets of chipboard needed per annum

The Transition Plan: -

Phase 1 commencing 1st September 2021:

Priority customers will be switched to Waste-Free Cut Decking

Phase 2 commencing 1st March 2022 – 30th June 2022:

Remaining customers will be switched over

We wanted to give you as much notice as possible, therefore there's no action for you to take right now. We will be in touch with our proposed transition plan for your sites over the coming months, including useful installation guidance.

Please do not hesitate to get in touch with your Staircraft contact if you have any queries at this stage.
