

Fire Safety Announcement

THE ONLY I-JOIST to be listed in the new STA Robust Floor Construction Pattern Book

Staircraft's i-Joists are:

- ✓ 30% safer than Fire Regulation requirement = **on average 9 more minutes to escape from a fire.**

- ✓ 3rd party verified by BRE, that our floors 'over-perform' in fire – providing the additional robustness needed if the critical plasterboard ceiling layer has been improperly stored, handled, damaged or installed.

Email sales@staircraftgroup.com or contact the undersigned for more information.
